REGULATORY IMPACT ANALYSIS AND TIERING STATEMENT

(1) Provide a brief summary of:

(a) What this administrative regulation does: This administrative regulation establishes Department for Medicaid Services (DMS) policies relating to telehealth. The coverage policies in this administrative regulation apply to a managed care organization's (MCO's) coverage of Medicaid services for individuals enrolled in the MCO for the purpose of receiving Medicaid or Kentucky Children's Health Insurance Program services. An MCO is only required to reimburse according to this administrative regulation depending on the rates negotiated with providers.

(b) The necessity of this administrative regulation: This administrative regulation is necessary to establish DMS policies relating to telehealth in accordance with KRS 194A.125 and KRS 205.559.

(c) How this administrative regulation conforms to the content of the authorizing statutes: This administrative regulation conforms to the content of the authorizing statutes by establishing DMS telehealth policies.

(d) How this administrative regulation currently assists or will assist in the effective administration of the statutes: This administrative regulation assists in the effective administration of the statutes by establishing DMS telehealth policies.

(2) If this is an amendment to an existing administrative regulation, provide a brief summary of:

(a) How the amendment will change this existing administrative regulation: The administrative regulation is amended to incorporate new definitions for “remote patient monitoring” and “in-person”. The regulation is also amended to establish a recipient rights’ clause to allow recipients’ the option to receive services in-person or via synchronous telehealth. A process is established that can result in a suspension from providing asynchronous telehealth services when a recipient is not accommodated after requesting in-person or synchronous telehealth. Telehealth policy is clarified to state that services are subject to in-person requirements established by state or federal law, a standard set by a professional criteria, a licensing body, or a billing code requirement. The department’s general policy is that telehealth services are reimbursable if they are appropriate and safe to be delivered via the technology used and not prohibited by the provider’s licensing board. In addition, a new patient may be established and an initial visit may be conducted via the use of synchronous telehealth. The administrative regulation also establishes telephonic service requirements. This is specifically in relation to existing telephonic codes and establishing a policy to reimburse at the lower reimbursement rate between an audio-only encounter and the telephonic code when a discrepancy in reimbursement rates exists. The administrative regulation also expands instances under which a provider may be restricted from providing telehealth services, including if the provider is subject to sanctions under 42 C.F.R. Part 455 or if the provider is physically located outside of the United States at the time of service. Finally, the administrative regulation requires providers to meet the same licensure and accreditation requirements that would be required for the provider to see the same recipient within an in-person setting. The administrative regulation is also amended to allow the department to recover the paid amount of an inappropriately paid telehealth encounter. The administrative regulation also establishes reimbursement for an originating site fee for rural health clinics, federally qualified health centers, and federally qualified health center look-alikes. The administrative regulation also addresses telehealth provided by out-of-state providers by requiring evaluation and monitoring of outcomes for recipients who are receiving healthcare services from out-of-state providers, requiring DMS to implement any participation restrictions established by state licensing boards, and establishing restrictions and limitations for out-of-state providers if there are concerns about healthcare quality and outcomes. Asynchronous telehealth services are expanded to include remote patient monitoring, and the regulation is further clarified to require that asynchronous telehealth services involve timely actual input and responses from the provider. Remote patient monitoring (RPM) is further expanded to include specific conditions, including conditions determined by the department to be appropriate and effective, require specific risk factors for RPM eligibility, and allow for RPM to be ordered by a physician, advanced practice registered nurse (APRN), or physician’s assistant. In addition, recipients are required to meet certain requirements to use RPM, and certain hardware and upgrades are potentially excluded from the RPM benefit. The administrative regulation further establishes requirements relating to telephonic services. Finally, the administrative regulation is amended to allow the department to post an informational listing of codes that are not allowed or that are subject to additional restrictions such as a requirement that services be conducted via both audio and visual connection for all participants.

(b) The necessity of the amendment to this administrative regulation: The amendment is necessary to ensure that policies stated in the administrative regulation are consistent with changes required by 2021’s HB 140, Ky. Acts Ch. 67, and to further incorporate best practices

learned by the large shift to telehealth that occurred during the COVID-19 public health emergency.

(c) How the amendment conforms to the content of the authorizing statutes: The amendment conforms to the content of the authorizing statutes by implementing changes required by 2021's HB 140, Ky. Acts Ch. 67, and further instituting efficiencies and best practices that have been highlighted during the COVID-19 public health emergency.

(d) How the amendment will assist in the effective administration of the statutes: The amendment will assist in the effective administration of the authorizing statutes by implementing changes to 2021's HB 140's (Ky. Acts Ch. 67) amendments to KRS Chapter 205. In addition, this amendment will further implement efficiencies and best practices that have been highlighted during the COVID-19 public health emergency.

(3) List the type and number of individuals, businesses, organizations, or state and local government affected by this administrative regulation: The Department for Medicaid Services, MCOs, any enrolled and credentialed provider who could provide appropriate telehealth services, and Medicaid members who may access telehealth services. Over the course of the COVID-19 public health emergency, the number of providers offering telehealth and the number of Medicaid members accessing telehealth services has greatly increased. There are currently over 1.4 million Kentuckians participating in the Medicaid program and 46,000 providers enrolled in the Medicaid program.

(4) Provide an analysis of how the entities identified in question (3) will be impacted by either the implementation of this administrative regulation, if new, or by the change, if it is an amendment, including:

(a) List the actions that each of the regulated entities identified in question (3) will have to take to comply with this administrative regulation or amendment: To be reimbursed for a telehealth service, a provider will have to comply with the policies and requirements established in this administrative regulation. Participation is optional, not mandatory.

(b) In complying with this administrative regulation or amendment, how much will it cost each of the entities identified in question (3). No cost is imposed on the entities regulated by the administrative regulation as participation is optional.

(c) As a result of compliance, what benefits will accrue to the entities identified in question (3). Those who opt to perform telehealth services in compliance with this administrative regulation will be reimbursed for services rendered.

(5) Provide an estimate of how much it will cost to implement this administrative regulation:

(a) Initially: The department anticipates that it will incur no additional expenses in the implementation of these amendments in the first year of operation.

(b) On a continuing basis: The department anticipates that it will incur no additional expenses in implementing these amendments on a continuing basis.

(6) What is the source of the funding to be used for the implementation and enforcement of this administrative regulation: The sources of revenue to be used for implementation and enforcement of this administrative regulation are federal funds authorized under the Social Security Act, Title XIX and matching funds of general fund appropriations.

(7) Provide an assessment of whether an increase in fees or funding will be necessary to implement this administrative regulation, if new, or by the change if it is an amendment: Neither an increase in fees nor funding will be necessary to implement this administrative regulation.

(8) State whether or not this administrative regulation establishes any fees or directly or indirectly increases any fees: This administrative regulation neither establishes nor increases any fees.

(9) Tiering: Is tiering applied? Tiering was not applied as telehealth service standards are applied equally to all affected individuals.
